

THE STORY OF USHER SYNDROME

Usher syndrome is a **RARE GENETIC CONDITION** that causes hearing loss, visual impairment, and problems with balance. We're each born with it, but it **AFFECTS US ALL DIFFERENTLY**. Currently there's no cure for Usher syndrome. But **CUREUsher** are trying to change that. **NOW, WE NEED YOUR HELP.**

VISIT THE STORY OF US**

Some of US can't see well.
Some of US can't hear well.
Some of US can't balance well.

**BUT THAT DOESN'T MEAN WE CAN BE
CATEGORISED, NOR SHOULD WE BE.**

Usher syndrome might be what we live with, but it doesn't define US. It is our connection, not our definition. We're all different. And we're all determined for change. We're just like you. Some of us surviving. Some of us thriving. Living life... but not a life designed for US.

So, before you make decisions on behalf of US, try to understand what it's like to be US in a world that doesn't understand US.

**SEE US, HEAR US, AND
PLEASE... REPRESENT US.**

**People know nothing about Usher syndrome.
And that means people know nothing about US.**

We need your help to change that. So the public understands US, and healthcare systems can see US. Our symbol – red and white, not just stripes and chequers. Not just on a dog's harness, nor on a cane. We want it recognised, as well known as a stop sign.

You have the power to do that. To help US, and to speak for US. To make the laws, change policies, and fund new thinking for US.

YOU CAN CHANGE THE STORY OF US.
